

METAL FABRICATION

Let PCI Exceed Your Expectations With Our Custom Solutions

Our Talented Metal Fabrication Experts Have More Than 40 Years Of Experience

Solid performance & quality relationships make PCI a trusted industry leader. Our highly experienced managers oversee every facet of each project - labor, quality, schedule and cost - giving you a superior result performed on time, on schedule and on budget.

METAL FABRICATION SERVICES

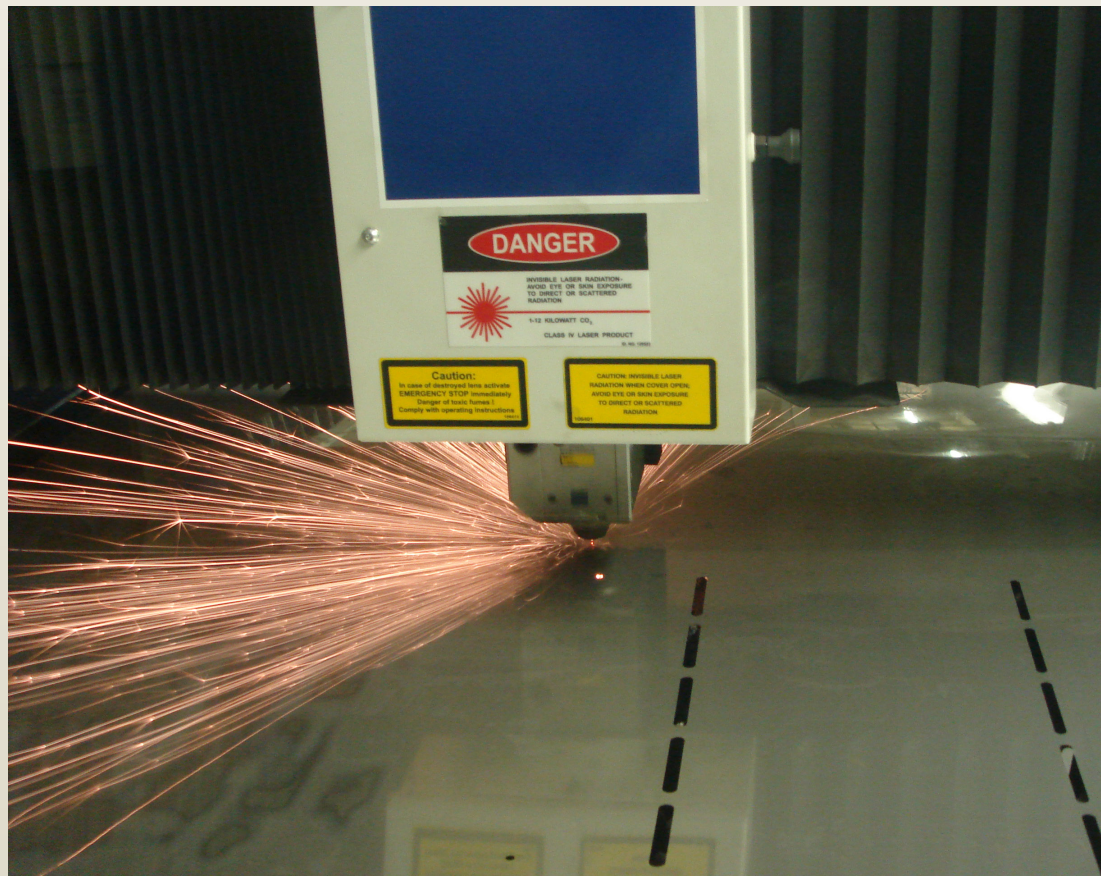

PCI specializes in a complete line of light and heavy gauge metal fabrication services. CAD design, laser cutting, forming and welding are just a few of the services we can provide. Let our extensive knowledge, expertise and dedication to quality be your solution to your next project.

LASER-CUTTING CAPABILITIES:

We have one of the largest production laser cutters in North America allowing us to cut thicker material faster and with cleaner lines. We compete directly with water jet cutters and lesser powered laser cutters. The difference is we can provide a high quality product faster which can save the customer money.

IF YOU CAN IMAGINE IT, WE CAN CREATE IT

Experienced Professionals with Creative Solutions

From the concept to the finished product, we can deliver complex metal solutions with unique details that only a talented and seasoned staff can provide.

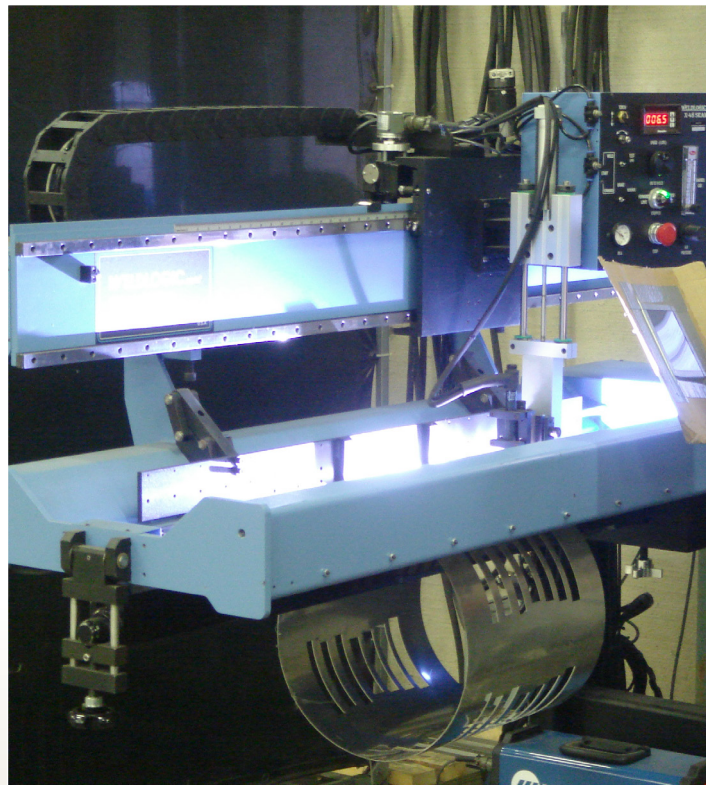

Choose Only The Services You Need:

- Outsourcing
- Design
- Laser Cutting
- Forming
- Fabricating
- Welding
- Prototype Development
- Engineering CAD Services

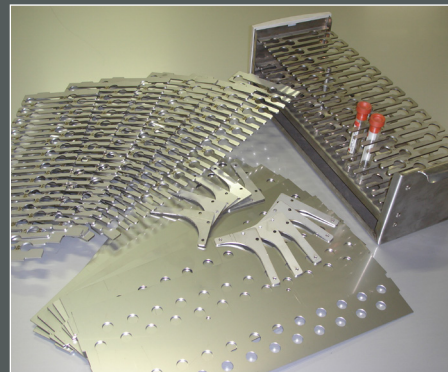

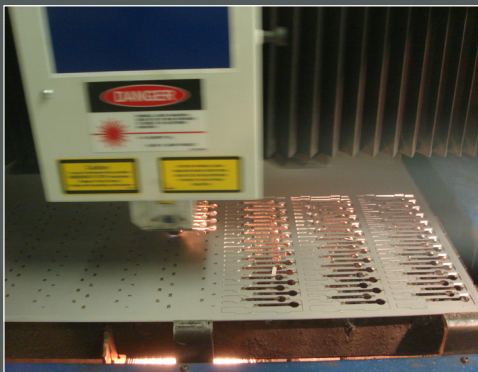

Welding Services For Every Possible Need

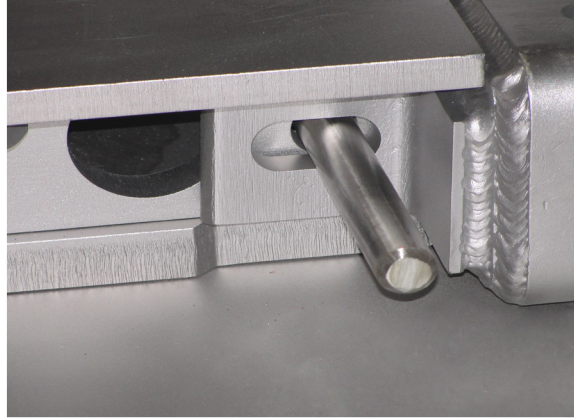

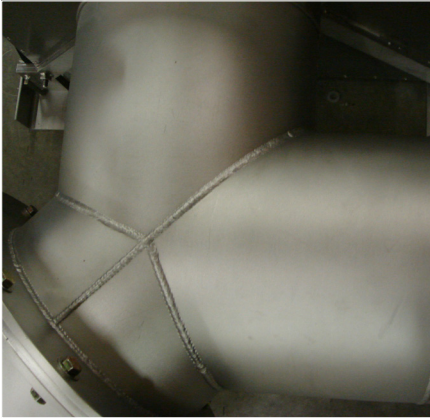

Our complete in-house welding capabilities allow us to complete any requirements you have specified.

- GMAW
- Fusion
- SMAW
- GTAW

STATE-OF-THE-ART LASER CUTTING EQUIPMENT

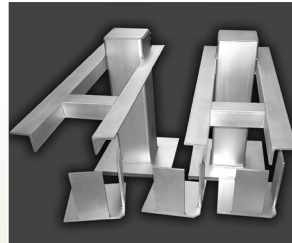

Quality Assurance Program

We have an extensive quality assurance program that can be utilized to meet your job requirements. Our quality assurance program is fully compliant to ISO 9001: 2008, 10 CFR 50-Appendix B, and ASME NQA-1 (2008).

- Design
- Procurement
- Fabrication

Appendix B Metals

We can provide a full range of safety-related materials for the nuclear industry compliant with our 10 CFR 50 Appendix B quality assurance program.

YOU HAVE PEACE OF MIND BECAUSE WE PROVIDE:

Safety
Performance
Value
Quality
Dependability
Custom Solutions

Custom Solutions • Quality Performance • State-of-the-Art Equipment

PCI ENGINEERED SYSTEMS MANUFACTURES ITS OWN PRODUCT LINES:

STATIC COMPRESSION BUILDINGS

Static Compression Building (SCBs) are the smart choice for temporary housing, storage, or office needs.

FEATURES:

- Low Initial Cost
- Insulated
- Low Sustaining Cost
- Quick Assembly
- Flexible Design
- Mobile

DATA ENTRY KIOSKS

Data Entry Kiosks are a perfect solution for businesses offering their customers access to tablet computers.

FEATURES:

- Secured Tablet
- Ergonomic Design
- Durable Construction
- Several Design Options
- Perfect for Hospitals, Clinics, & Waiting Rooms

RADIATION BARRIER PANELS

Radiation Barrier Panels are a wall system designed to help lower radiation levels in targeted high radiation areas.

FEATURES:

- Lead Free
- Portable
- Free Standing
- Used in Nuclear Power Plants, Hospitals & Clinics
- Several Design Options

OUR METAL FABRICATION BUSINESS IS BUILT ON SERVICE

Running out of time? Have a last-minute change? Have a tight schedule?
